

Program Management System

Summary

Industry : Communication

Profile: India's largest private sector company in Communication sector.

Business Requirement: Client wanted to convert excel based Program management to an efficient SharePoint based solution.

Solution Benefits

- Improved efficiency with ease of accessibility and usage, trend comparison
- Workflows and Alerts
- Central repository of Project documents,

About Client

Our Client is India's largest private sector information and communications company, with over 150 million subscribers. It has established a pan-India, high-capacity, integrated (wireless and wireline), convergent (voice, data and video) digital network, to offer services spanning the entire infocomm value chain.

Background

Client was using excel for managing and tracking there projects for IT, Networks & Call Centre/BPOs. As it was not secured and efficient tool for managing the projects and maintaining different & duplicate versions of project excel files. And there is no real-time data available in reports, so they decided to go for SharePoint based solution.

The key drivers for Solution were:

- Offline - Template based Project data capture in Excel Sheet
- Data Privacy and Access control issues
- Data Manipulation issues – quality and accuracy
- No Alerts and Workflows
- No Dashboards to see real-time data for all projects
- Manual follow-ups and consolidation of Data issues due to template changes

issues, risk,
milestone, etc.

- Get latest updates of projects in real-time

Technology

- SharePoint 2010,
Visual webpart

Axisvation's Solution

- Created Online Web Portal for Project data capture and Reporting
- Creating sub site for each projects to Manage Project details like scope, issues, risks, milestones, commercials, project success, etc.
- Visual Web part for capturing Project data on SharePoint Server
- Corporate AD authentication for Login to the site with Read / Write access

Benefits to Customer

- Web based Intranet application offering ease of usage
- Secured Access to critical data/information
- Data storage for future data analysis or mining activity
- Easy transition from existing system to new web based solution
- Rapid Delivery and within budget.
- Central repository for each project data.
- Real time report on Project status
- No more need to handle Project data in excel
